

Juan José del Río Holgado

C/ Burgos, 3, Portal 5, 2 A
29680, Estepona, Málaga (Spain)
(+34) 616 512 340 / www.jjrh.es / juan@jjrh.es

GOAL A position that allows me to administer and develop computer systems, and also enables me to collaborate in the decision making process of them.

EDUCATION *Computer Engineering (Ingeniería Técnica en Informática de Sistemas)*
Universidad de Málaga, Spain, 2002–2007
Universidad Nacional de Educación a Distancia, Spain, 2007–present

SKILLS *Languages and Software:* XHTML, CSS1/2/3, RSS, Tcl, AOLserver, Apache, lighttpd, PHP, PostgreSQL, MySQL, C#, Visual Basic 5/6, C, C++, Java, bash/shell, SiteScope, Cacti, JIRA, Confluence, VMWare Infrastructure.

Operating Systems: Linux (expert, 8+ years), FreeBSD (medium, 2+ years), Windows (medium, 6+ years), OS X (basic knowledge).

Electronics: Experience with Motorola/Renesas M16C/62A microcontrollers.

Computer Networks: Experience in planning and deployment of computer networks with hundreds of workstations. Broad experience in wireless networks.

Management: I have experience in managing small teams (usually no more than 5 members) from my position at my previous company, and several organizations I have led. I have also trained new employees. I have also created, implemented, modified and removed procedures for staff.

CURRENT POSITION **Florex Plus S.L. / Riplife** April 2009 – present
www.riplife.es
Calle Severo Ochoa, 10, Parque Tecnológico de Andalucía, 29590 Málaga (Spain)

Production Support Specialist. Company size: around 50 workers.
Internet & Desktop Software Development company.

- Supervise production and corporate servers (mostly Apache/Tomcat).
- Work closely with other departments to analyze and implement business requirements.
- Escalate problems and provide reports to managers and developers as needed.
- Work with teams across the globe with different working schedules.
- On-call several days a week to assist production issues.
- Setup monitoring systems such as HP SiteScope and Cacti.
- Use JIRA to track issues, and document procedures and systems to Confluence.

EXPERIENCE

Simple Option S.L.

August 2005 – December 2008

www.simpleoption.es / www.simpleoption.com

Avda. Editor Ángel Caffarena, N11, B11, 1B, 29010 Málaga (Spain)

Co-founder of the company. Company size: 4-5 workers.

Online retailer and wholesaler for products imported mainly from Italy, United Kingdom and Sweden. Provider of reading accessories for all the stores in Spain of Casa del Libro (the biggest bookchain in Spain).

- Development and maintenance of the company's computing infrastructure using FreeBSD and Linux servers:
 - Design and implementation of product and customer databases.
 - Development of the entire simpleoption.com website using AOLServer.
 - Maintenance of company's critical services (e.g. Website, e-mail system).
 - Design and implementation of systems for the company's internal usages (e.g. Websites statistics, user tracking, internal communication tools).
 - Responsible for the version control system for software source code and business documents.
- Customer service and relations with international providers.
- Company representative in several international events (Frankfurt bookfair, London startups-company event).
- Collaboration in the hiring process and training of subordinates.
- Product compliance to Spanish laws (e.g. Translations, special labeling).
- Negotiation of the supply contract to Casa del Libro (a branch of Espasa Calpe).
- Management of several IT-related projects for individual customers, small companies, and a public institution (University of Malaga).

Empresa Malagueña de Transportes, SAM

Easter 2006–2009

www.emtmalaga.es

Camino de San Rafael, 97, 29006 Málaga (Spain)

Company size: around 800 workers.

Local transport company. A pioneer project started in Easter 2006. It consists of using the company's communication infrastructure to keep all the citizens informed about Easter parades. Every year, the transport company gets great media coverage because of this unique initiative.

- Work together with another partner to gather information from different sources such as GPS sensors, radio, and TV to offer the most updated information to all the citizens via SMS messages, company's website, LED screens in the bus stops and inside the buses, and some other media.
